### NOTICE TO CONTRIBUTORS

1. Authors are reminded that concise and clearly expressed papers are those most welcomed by readers and the Editorial Board. All manuscripts are independently refereed.
2. Manuscripts should be typewritten in double spacing, with wide margins. They should be fully corrected and alterations in proof may be disallowed or charged to the author. A sample typescript showing layout is available on request from the editorial office. Three copies of each manuscript should be submitted, including tables and figures.
3. The text should indicate the purpose of the paper, and should include an introduction, sections on materials and methods, results, and a discussion relevant to the findings. A brief factual summary should be provided at the beginning of the paper.
4. Scientific measurements should be in SI units (*Units, symbols and abbreviations; a guide for biological and medical editors and authors*, 3rd ed. London: Royal Society of Medicine, 1977). Blood pressure may be expressed in mmHg and haemoglobin concentration as g/dl.
5. Tables must be kept simple and vertical lines should be avoided. Tables and illustrations must be kept to a minimum and data should not be given in both text and tables. Line drawings should be used where possible and symbols must be large enough to be legible when reduced to text size. Where possible, size of illustrations and tables should be planned so that one or more can easily fit the page size of 19.5 x 12.5 cm. Photographs and other illustrations should be unmounted, and authors may be charged for these at cost price. Authors' names and the top of the figure should be marked in soft pencil on the back.
6. References should be restricted to those really necessary and useful. This journal uses the 'Vancouver' style (see *British Medical Journal* 1982; 1: 1766-70 and *Lancet* 1979; 1: 429-30). Text references are numerical. Each reference should include:
  - i) a list of all authors when six or less (when seven or more only the first three should be listed followed by *et al*).
  - ii) the title of the article.
  - iii) the title of the journal (abbreviated to the form published by Index Medicus).
  - iv) the year;
  - v) volume number;
  - vi) first and last pages.eg  
McCoy GF, Dilworth GR, Yeates HA. The treatment of trochanteric fractures of the femur by the Ender method. *Ulster MedJ* 1983; 52: 136-41.  
Book references should give the author, title, edition, town of publication, name of publisher, year of publication, and, where appropriate, volume and page numbers.
7. Twenty-five reprints of each article will be forwarded free of charge to the corresponding author. Further reprints can be obtained from the printers, Messrs Dorman & Sons Ltd, 1-3 Holmes Street, Belfast BT2 7JG, who should be approached directly.
8. Editorial communications should be sent direct to the Editor who will be pleased to advise on the preparation of manuscripts if requested.  
Fellows and Members of the Ulster Medical Society receive the Journal free. Individuals may subscribe directly (see back page). The journal contents are covered by *Current Contents: Clinical Practice*, *Index Medicus*, *Excerpta Medica* and *Science Citation Index*.
